GUIDE INDICE COMMERCIAL CANADIEN

2ème PARTIE

Commençant à la page 271, sur papier vert, se trouvent les noms et les adresses des manufacturiers.

3ème PARTIE

Commençant à la page 493, se trouve une liste alphabétique des articles fabriqués au Canada, donnant les noms de toutes les maisons qui les fabriquent.
Le mot principal en anglais est ordinairement placé le premier, suivi d'une phrase le modifiant, p.e.: Quincaillerie, de construction: Cuir, coupe de bottines et chaussures. Mais, quand l'inversion ne semble pas faisable le mot modifiant est placé le premier, et est ainsi arrangé dans la liste alphabétique, p.e.: Mécanisme de piano—Piano hammers; Shoe packs—Chaussures en cuir tanné à l'huile. En cas de doute on peut essayer les deux méthodes. Quand deux noms ou plus sont communément employés pour le même article, nous avons essayé de donner des explications vis-à-vis. Quand on désire l'adresse de la rue, voir la 2ème Partie, commençant à la page 271. Les noms des fabricants qui font ou sont intéressés dans le commerce d'exportation sont indiqués par un astérisque★.

4ème PARTIE

Commençant à la page 977, la Section Spéciale indique les noms des exportateurs principaux des produits de la ferme, etc. La traduction française se trouve au revers.

5ème PARTIE

À la page F-1 sur papier vert, la Section de Traduction Française commence. Les noms des articles donnés dans l'Indice Français sont suivis par leur équivalent en anglais, et l'équivalent anglais se trouve placé alphabétiquement dans la 3ème Partie.

Wherever big things are going on there you'll find the engineer

Wherever you go in Canada today, you see the work of the professional engineer. A river's course is changed and its rushing power harnessed for man's needs . . . an oil pipeline scales a mighty mountain range . . . a highway is punched through the rocky wilderness . . . and behind each mighty accomplishment stands the engineer.

Behind our many new industries, unknown a decade ago, as well as the unprecedented development of our natural resources —stands the engineer. His is the vision and the orderly thinking that is contributing so much to Canada's phenomenal expansion.

WE OF CANADIAN GENERAL ELECTRIC never forget that ours is essentially an engineering organization. We know that our progress depends on the constant recruitment of young engineers and are proud of the contribution we are making to their training.

Engineering graduates join this Company each year

Each year, since its earliest days, engineering graduates have joined this Company to continue their training in special courses—nearly twelve hundred have already gained invaluable experience on the Company's well-known "Test" Course.

The purpose of the course is primarily to ensure a constant supply of trained talent for this Company. A high proportion of the executives of this organization got their start on the "Test" Course.

The course over the years has also contributed a constant stream of highly-trained graduates to fill the ranks of Canadian industry. In fact, it is a source of pride that not a few of them are to be found today holding important positions in many widely diversified engineering fields.

Everybody benefits from the engineers' work

Canadian General Electric currently employs some eight hundred engineers —that's one out of every eighteen employees —and is continually adding to their number. These men — whether they work as development, design, production, application, sales or service engineers, in the electrical, mechanical or chemical fields—are in the final analysis working for *you.*

They develop, design and manufacture the complex electrical equipment that generates power, transmits it across great distances, controls it and then puts it to work for the common good. They are constantly improving and simplifying existing products to increase their efficiency and lower their cost. They develop brand-new products to meet brand-new needs. In cooperation with our customers' engineers they design and install equipment to meet specialized needs —to raise productivity and to lower costs.

The engineers' part in Canada's rising prosperity

It is an important part of their work to find new methods of manufacture, and to develop new equipment and products that do more, last longer, cost less to operate. It is by employing outstanding engineers *—the key men in Canada's progress—* that we are able to play a worthy part in our country's industrial growth, and in the developments that are raising our living standards.
